Politics and structure of global women's health movements. Relationship between health and phenomena such as international politics, globalization, economic policy, and conflict and war. Global political and economic institutions and policies impact health globally. The course investigates how women's non-governmental organizations have attempted to transform existing institutions and policies of global health governance such that people everywhere can lead healthier and more dignified lives.

01:988:409 / 19360 : 90   GENDER, ENVIRONMENTAL JUSTICE & HEALTH

Professor Heidi Hoechst

Examines women's health in relationship to contradictions between capitalist growth and resource exhaustion. Health consequences of environmental crises linked to new markets and technologies. In the last quarter century, the premise of the possibility of endless growth for the purpose of unlimited capital accumulation has met the inevitable challenges of resource exhaustion on a global scale and its human consequences. Markets and technological innovation are inadequate to solve the resulting environmental crises. This course examines the externalized business costs paid in the currency of human health and health consequences such as illness caused by toxic industrial byproducts, injury from resource extraction processes such as nuclear fission and deep-water oil drilling, manifold health hazards of violent conflict over control of scarce resources in postcolonial states, and dangers that attend climate change.

01:988:412 / 15602 : 90   GLOBAL FOOD POLITICS: HEALTH CONSEQUENCES

Professor Omid Mohamadi

Politics and structure of global women's health movements. Relationship between health and phenomena such as international politics, globalization, economic policy, and conflict and war. Global political and economic institutions and policies impact health globally. The course investigates how women’s non-governmental organizations have attempted to transform existing institutions and policies of global health governance such that people everywhere can lead healthier and more dignified lives.
