Instructor: Heidi Hoechst
This course investigates the current state of the global economy with a focus on how economic inequality produces wide disparities in health risk, access to healthcare and clinical outcomes. It also explores how domestic and global structures related to economic trade and migration create dysfunctional healthcare delivery systems. Students leave the course understanding why transnational struggles for a single standard of care for all people will heal inequality in our global society.

Instructor: Heidi Hoechst
This class interrogates the political-economic context in which Big Pharma has evolved and the ethical implications of market-based health care. It prepares students to advocate for research and fair distribution of life-saving medicines as a necessary component of an equitable healthcare system.

Instructor: KB Burns-oxendine
This class situates professional nursing within the broader global context of the transnational care economy. Students will learn about the intimate nature of care work and identify how intensive physical labor, person-to-person communication and human touch pose a challenge to market-driven efforts to increase profit-making through mechanization and exploitation of nurses, migrant and precarious workers. It identifies strategies that care workers have used to improve working conditions and their ability to deliver safe, therapeutic and effective care both domestically and globally.

By checking this box, I certify that I have visited the website for the Office of the Registrar, have reviewed and will follow the Policies and Procedures, including information on tuition and fees, schedule revisions and deadlines. I also understand that I am fully liable for all university tuition and/or fees associated with my registration and will make payment or arrangements for payment suitable to the university prior to attendance and will not receive confirmation of registration until such time as payment has been received. I understand that registration is not guaranteed and is contingent on space availability and/or departmental approval. I also understand that transferability of credits is solely determined by the institution(s) I have applied to or am matriculated in. In addition, I recognize that registering for courses via Rutgers Continuing Studies does not guarantee acceptance into any academic program other than the Certificate in Women’s Global Health Leadership.
